

# HOSTED MCP VERIFICATION REPORT

Status: PASS

Endpoint: <https://commerce-mcp.ritikaxg.co.in/mcp>

Transport: Streamable HTTP

Authentication: Bearer token supplied privately

## MCP Inspector verification

- Authenticated connection succeeded.
- Exactly five approved tools were discovered.
- ORD-1042 investigation, escalation, review-case and trace reads succeeded.
- No commerce mutation tool was exposed.

## MCP-compatible AI client verification

- Gemini CLI connected to the same hosted endpoint.
- The client reported commerce-ops-hosted Ready with five tools.
- The model selected `list_demo_cases` and `investigate_order_exception`.
- Grounded result: `ASSIGNED_WAREHOUSE_OUT_OF_STOCK`.
- Assigned warehouse WH-A had zero stock; WH-B was eligible.
- Suggested queue: `FULFILMENT_OPERATIONS`.
- Recommended action: human review; no automatic operational change.
- `commerceStateChanged=false`.

## Conclusion

The hosted MCP was verified through both MCP Inspector and an independent MCP-compatible model-backed AI client. The deterministic MCP workflow remained authoritative and no commerce state was changed.

Deployment application SHA: 3ac6c89da3f7d7675256c23cc65e257e4e10892b

Phase 12 merge commit: c4fb3eed9aa6a9a14d42f33087f86099fe12382b

Verification date: 1 August 2026
